

ROHIT TOLETY

Graphics & Tools Programmer

mail2rohitoley@gmail.com

| phantom7knight.github.io

| linkedin.com/in/rohit-tolety

TECHNICAL SKILLS

Programming Languages	:	C++, C, C#, HLSL, GLSL, Python
API	:	OpenGL, DX12, Vulkan
Development tools	:	Visual Studio, VS Code, Unity Engine, Render Doc, Razor GPU, PIX GPU, ImGui, Helix P4V
Version Control	:	Perforce, Git

WORK EXPERIENCE

Qualcomm (USA) (Senior Software Engineer)

Apr 2025 – Present

- Currently working in the **GPU Compiler Infrastructure/QA** team and support teams **Gaming** and **Tooling** endeavor.
- Working on the game's **Shader Code generation** on Qualcomm Compute devices & perform **analysis** for further improvements.
- Work on the internal **Tools development** which primarily helps with the GPU Compiler team for faster iterations.

Ubisoft Red Storm Entertainment (USA) & Ubisoft Red Lynx (Finland) (Tools Engineer)

Mar 2021 – Mar 2025

- Worked with **Anvil & Snowdrop Engine** to improve editor experience work flows and implement new engine features.
- Worked on the Ubisoft's **Rainbow Six Siege's Tools** pipeline workflow and Rendering tasks primarily on Shader bug fixes.
- Work directly with different disciplines like **Artists, Designers & Engineers** on content creation & workflow tools.
- Took additional responsibility in the rendering tasks such as refactor of **Shader Editor** workflow for Ubisoft's **Snowdrop** teams by adding support for Instant Shader Compile for viewport updates, Deferred Shaders Preview and Editor/Node Viewport preview updates.
- Support **Achievements** specific tools related to first party & **Localization** team's internal tools with feature additions.
- Added support for **Hot Reload** of the constant data from editor, so that users can view their changes live, cutting their time significantly to see the output faster and spend less time waiting for the services to start.

MICROSOFT Turn 10 Studios (Tools Engineer)

May 2020 – Mar 2021

- Contributed to the shipping of "**Forza Motorsport**" and worked on the **Internal Editor** as Tools Programmer.
- Work with teams internally to support/enable them with their workflow needs & also investigate issues for **Turn 10's Internal Editor**.
- Worked closely with **Audio** Team to integrate **Audio Graph Editor** features for their workflow.

Run Games LLC (Game Programmer Intern)

Nov 2019 – May 2020

- Shipped Project: **Beyond Blue**, a **Unity** Project on **Play Station 4 / XBOX One / Apple** platforms.
- Worked on **Optimizations** tasks & **Debugging** the issues related to project on consoles through Unity & built in Console profilers.

The Forge Interactive (Programmer Intern)

Jul 2019 – Sept 2019

- Implemented file system in **The-Forge** engine making it generic with supports for different File Systems on all platforms using **LibZip**.
- Worked on bugfixes, porting the unit tests from Windows to XBOX One platform.

ACADEMIC/PERSONAL PROJECTS

Personal Graphics Work

Sept 2018 - Present

- Currently working on personal project to learn **CUDA** programming to understand **GPU** work much better.
- Exploring **PBR-IBL** for the material workflows to make the Material Editor more helpful.
- Learning **DX12 & VULKAN** using **NVRHI** & implemented **Forward + Deferred Hybrid Rendering, GLTF Material Editor**.
- Worked on OpenGL engine to support **Forward** and **Deferred Rendering, Bloom** with **Gaussian Blur, SSAO, Particle System** using **Compute Shader**.

Academic Game Project (Graphics/Gameplay Programmer)

Sept 2018 - Apr 2019

- Worked on academic game project on 3D game engine in a team **Rendering Pipeline**, player camera and bug fixes.
- Added features such as **Deferred Rendering, Normal and Environment Mapping, Cube Maps, Bloom, BRDF lighting**.

EDUCATION

DIGIPEN INSTITUTE OF TECHNOLOGY

MS IN COMPUTER SCIENCE

May 2019

PEOPLE'S EDUCATIONAL SOCIETY INSTITUTE OF TECHNOLOGY BE IN COMPUTER SCIENCE
