github.com/phantom7knight

Technical Skills

Programming Languages	:	C++, C, C#, GLSL, familiar with HLSL
API	:	OpenGL, ImGui, familiar with DirectX 11
Development tools	:	Visual Studio, Unity Engine, Render Doc
Version Control	:	Git

Academic Projects

Graphics Programmer

3D C++ Game Engine (Group)

Sept 2018 – Present

- Worked on Rendering Pipeline for the engine in OpenGL.
- Added features such as Deferred Rendering, Normal mapping, CubeMaps, Reflection and Refractions.
- Integrated Lighting System with both Phong and BRDF lighting models for directional and Point Lights.

Graphics Programmer

Graphics Engine (Solo)

Sept 2017 – Present

- A forward rendering engine using OpenGL and C++
- Supports Microfacet BRDF lighting model, added post processing effect such as Bloom with Gaussian Blur.
- Implemented Particle System on GPU using Compute Shader which will allow up to 2 Million+ particles on screen.

Programmer/Level Designer

Rect Game (Group)

Jan – April 2017

- Crafted in game levels as a Level Designer.
- Worked on BRDF lighting model.
- Implemented gameplay mechanics such as Gun and Bullet mechanics.
- Worked on level editor UI using ImGui which helped team in level generation.

Other Academic Projects(Solo)

Phantom Engine(Solo)

Aug–December 2017

- Developed Component based engine architecture.
- Added custom math and physics libraries and used OpenGL for rendering.

Space Shooter Game(Solo)

Aug–December 2017

- Game made using Phantom Engine where player deals with asteroids charging towards the player.

Education

MASTER IN COMPUTER SCIENCE

DigiPen Institute OF Technology

Expected : May 2019

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE

PEOPLE'S EDUCATIONAL SOCIETY INSTITUTE OF TECHNOLOGY

June 2017
